

Meeting Agenda: RENEWABLE ENERGY PROJECTS

- 2 RENEWABLE ENERGY PROJECTS
- 2.1. MANUFACTURE OF SOLAR/RENEWABLE ENERGY EQUIPMENT/COMPONENTS IN USMAN FACTORY SPACE IN KADUNA.
- Factory space about 2000sqm secured. Facility can be used to establish a manufacturing plant for solar products.

Meeting Agenda: RENEWABLE ENERGY PROJECTS

- 1. Partner with Kool-Baker Global and Center for Global Africa through our contact with Kevin Hayden for Micro Grid solutions for different renewables as we see fit
- 2. Partner with Galvin Center for Renewable Energy if we have sophisticated smart grid opportunities
- 3. Partner with Holistic Solar Solution for solar equipment manufacturing and franchising.
- 4. Probably make use of Sungrow equipment in the large scale solar power plant

Is it possible to re engage these companies for various types and levels of partnership ?

CONCLUSION

- As a startup company with over thirty-five members in different countries, it is worthy of note that 3PL has young members for sustainability and succession. Team competence, capacity, and connection is spread in different countries of the world.
- The company is positioning to make significant impact in the economy and contribute to the industrialization of Nigeria and Africa.

Prayer

We at 3PL hereby invite you to join us add value to 3PL as defined by the MOU.

THANK YOU!
